

Feel the world through your senses

Multisensory environments

Inclusion, innovation, inspiration. **Are you in?**

Qinera

Why choose us?

Ongoing support & advice

Our expert team of therapists, technicians, and engineers provides tailored advice and ongoing guidance to ensure the sensory space meets your customers' needs. We are close to you.

Latest technology & innovation

At Qinera, our in-house R+D+i team is continuously innovating to develop new ideas and solutions, enhancing your customers' sensory experiences.

Custom Solutions

We provide flexible and customizable solutions. Each space is uniquely designed to meet specific needs, whether it's a cozy corner or an expansive healthcare facility project.

Quality Assurance

Our products come with a 3-year warranty covering manufacturing defects and offering convenient collection services. Our experienced after-sales support team ensures fast and reliable service.

We have successfully installed more than 700 sensory environments around the world.

Dive into our sensory spaces

Spaces for everyone, designed for therapeutic, educational, well-being, and leisure activities.

Well-being, memory work, controlling the environment, participation, sensory integration, communication, fun, personal autonomy, interaction or relaxation. It is easy to create and carry out a different activity every day based on the user's specific interests in order to reach your chosen educational or therapeutic goal.

Scalable and customizable

Turn the space into anything you want!

Our sensory spaces allow you to start slowly. You can begin with a bubble tube, a pouf, or some fiber optic strands, then gradually add different elements to provide more therapeutic intervention and well-being opportunities. When you choose to expand your resources, every installed element in the space remains useful and becomes part of a fully customizable interactive environment with an integrated controlled system, thanks to Qinera's unique technology.

**Start small,
expand as you go.**

Adapting the spaces to each user's needs and abilities is quick and straightforward. You can integrate different environments or create new ones by incorporating images, songs or your favorite YouTube videos. Additionally, you have the flexibility to use your own files from a USB device or the internet.

**Tailor the space
to your desires.**

The user has complete control over the environment, deciding when and how to change it while engaging with others and actively participating. Coordinating the activation of elements and effects in the room provides integral stimulation, resulting in a fully immersive experience. The therapeutic possibilities are endless.

Interactive

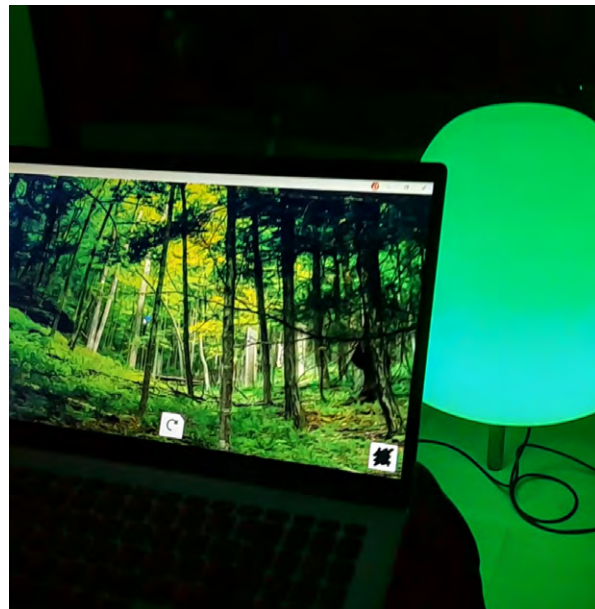

Take control like never before!

Just one movement changes everything. The control system integrates every element and effect in the room, allowing you to activate one or more of them simultaneously with the touch of a single button.

Choose the best control method for each person from our range of available controllers.
(see Page 18)

Experience the potential of Qinera's technology, where users receive information through multiple sensory channels, promoting perception and understanding through more than 300 different activities. By integrating classic elements of multisensory rooms with advanced features like synchronized lighting, sound, and special effects, we create immersive environments. These environments offer integrated stimulation as part of personalized therapy programs.

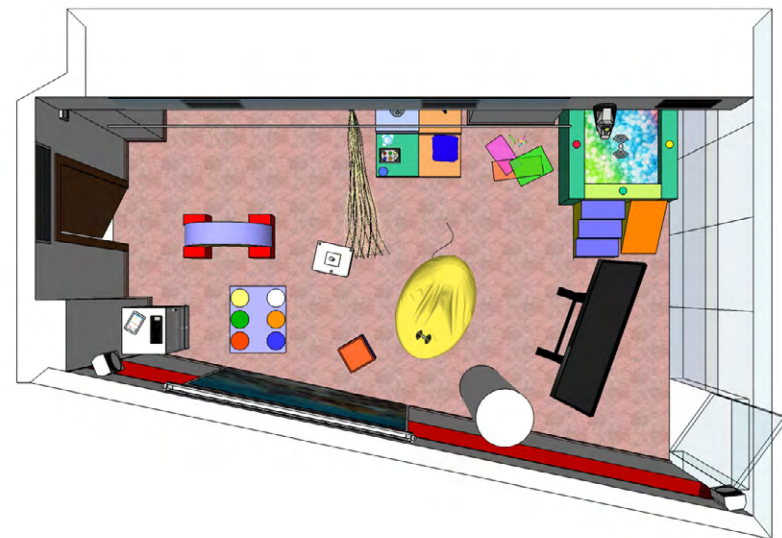

Our own technology

Custom designed by experts

What makes our multisensory spaces distinctive is their ability to utilize "scenes", enabling the projection of videos and images alongside various elements and effects with a single press of a button. Additionally, our technology offers an extensive range of editable and customizable content developed by specialists, further highlighting Qinera's features.

**Enjoy a truly
immersive experience!**

→ Qinera technology and its scenes have been designed and tested by professionals and experts in special needs education, occupational therapists, psychologists and IT developers that specialize in usability and interaction.

← Qinera technology allows you to transport your senses to somewhere near the sea, feeling the wind blowing and the touch of the bubbles, while the sitting vibrates in the rhythm of the roar of the waves.

A space for every need

Accessible spaces for all. A sensory space can start as a simple corner with basic elements like a vibroacoustic pouf, a bubble tube, or fiber optic strands in a bedroom, offering a therapy starting point. Or, it can evolve into a fully customizable interactive space with an integrated control system.

Discover all the benefits of multisensory spaces, where each moment is an invitation to explore, connect, and thrive. Within these immersive spaces, users experience an integration of sensory inputs, encouraging increased sensory awareness and active participation. It creates a dynamic platform for communication and interaction, and a sanctuary for emotional regulation and anxiety reduction.

The benefits of sensory spaces

Qinera's Technology can be used in different settings, meeting your needs and goals. Here are some of the benefits of our multisensory spaces:

Early Childhood

Transform your spaces into inclusive environments that foster exploration and movement, seamlessly guiding individuals from perception to action. Utilize tools that enhance communication, promoting understanding and expression. Cultivate the development of both physical and social identity, empowering users to learn through playful engagement. Use the power of music to stimulate psychomotor, cognitive, and emotional growth, while igniting imagination and creativity.

Cerebral Palsy

Take small steps from simple to more complex activities, adjusting as needed. Learn to recognize your body and control your surroundings. Use the sensory space to improve balance and body awareness. Explore endless possibilities in a fun and engaging way. Practice talking and sharing your thoughts. Make your users live amazing experiences!

The Elderly

Start with simple activities that anyone can enjoy, adjusting them to fit different abilities. Share stories and memories to connect with each other. Keep your mind sharp with personalized challenges. Stay active and mobile with exercises tailored to your needs. Experience positive emotions through connecting with the environment, engaging in communication, and promoting overall well-being.

ASD

Craft environments where sensory experiences are carefully managed and adjusted. Support individuals in regulating their sensory responses. Use positive reinforcement to motivate and encourage engagement. Foster communication and language skills within this controlled setting. Ensure effective sensory processing and integration by focusing on individual inputs.

Address fears and anxieties in a safe, virtual environment. Develop language through sensory storytelling. Offer personalized leisure activities to promote overall well-being and relaxation.

Brain Injury

Enhance sensory processing by facilitating the perception, organization, interpretation, and integration of various stimuli from the environment. Focus on improving motor control, including elements to enhance proprioception and body schema awareness. Boost cognition by offering unlimited cognitive content. Promote communication and language skills. Regulate emotional states and anxiety levels by providing meaningful and enjoyable experiences.

Down Syndrome

Craft flexible content that can be easily changed to suit individual preferences, allowing for precise control over sensory experiences. Tailor the environment to meet the specific needs of each user, promoting comfort and engagement. Encourage the development of motor skills through interactive activities. Offer meaningful tasks to promote normalization, participation, and daily activity. Use cognitive stimulation to slow down the decline in cognitive function. Maximize opportunities for physical, social, and mental well-being, fostering a holistic approach to health and happiness.

Ask us for the free Activity Books when buying our multisensory solutions!

Discover the power of sensory stimulation and the benefits it offers in a small space or even just the corner of a room. The Luminea Corner is a space for activating the senses, exploring and interacting. When you decide to expand the room and resources, rest assured that the existing elements will remain valuable and seamlessly integrate into the enhanced environment.

A plug and play corner

+

Luminea Corner is the perfect solution for a small, cost-effective and easy to set-up sensory environment. Simply unpack and use it. Easy peasy!

This sensory corner is self-installing, user-friendly, and brimming with therapeutic possibilities for all. The Luminea Corner enhances sensory processing, self-awareness, postural control, visual tracking, turn-taking, and decision-making. It's perfect for initiating therapeutic interventions and fostering a calm, relaxed state or increasing user engagement.

Additionally, it promotes communication and interaction by empowering users to activate and control the sensory environment, placing them at the forefront of the session.

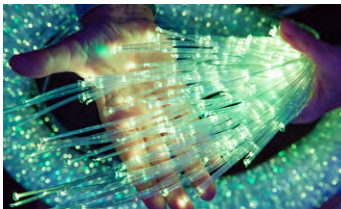

A wide range of activities targeting various therapeutic goals.

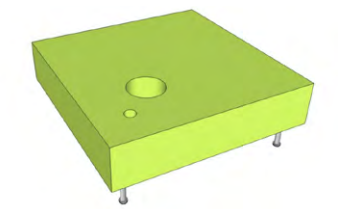

Luminea Corner includes all these products

- BJ-LRIN23

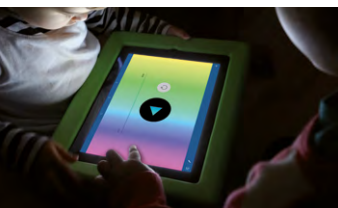

1 Luminea Bubble Tube

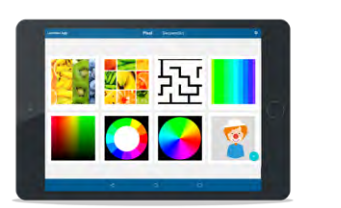

2 Luminea Fibre Optics 2 m
- 

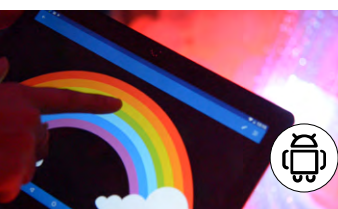

3 Square base for bubble tube and fibre optics

4 Luminea Router
- 

5 Luminea Tablet

6 Luminea App for Android
- 

7 Luminea corner activity guide

We have designed a unique App which works in conjunction with our lighting devices. It comes with many activities, and also allows you to upload your own images and convert them into your personal remote control. Who says a light is only a light?

Qinera sensory spaces provide users with an environment where stimuli can be tailored and managed to individual preferences. With the right mix of sensory aids, it is easy to create a safe, secure environment in which to guide users towards a state of calm and ensure that the subsequent interventions are smooth and pleasant.

A room for dreaming

An ideal space for connecting with oneself and the environment

The user receives sensory input in the most pleasant and easily comprehensible manner tailored to their individual needs.

Benefits:

- helps regulate behavior
- aids concentration and focus
- activation-relaxation consciousness
- well-being and building a positive mindset

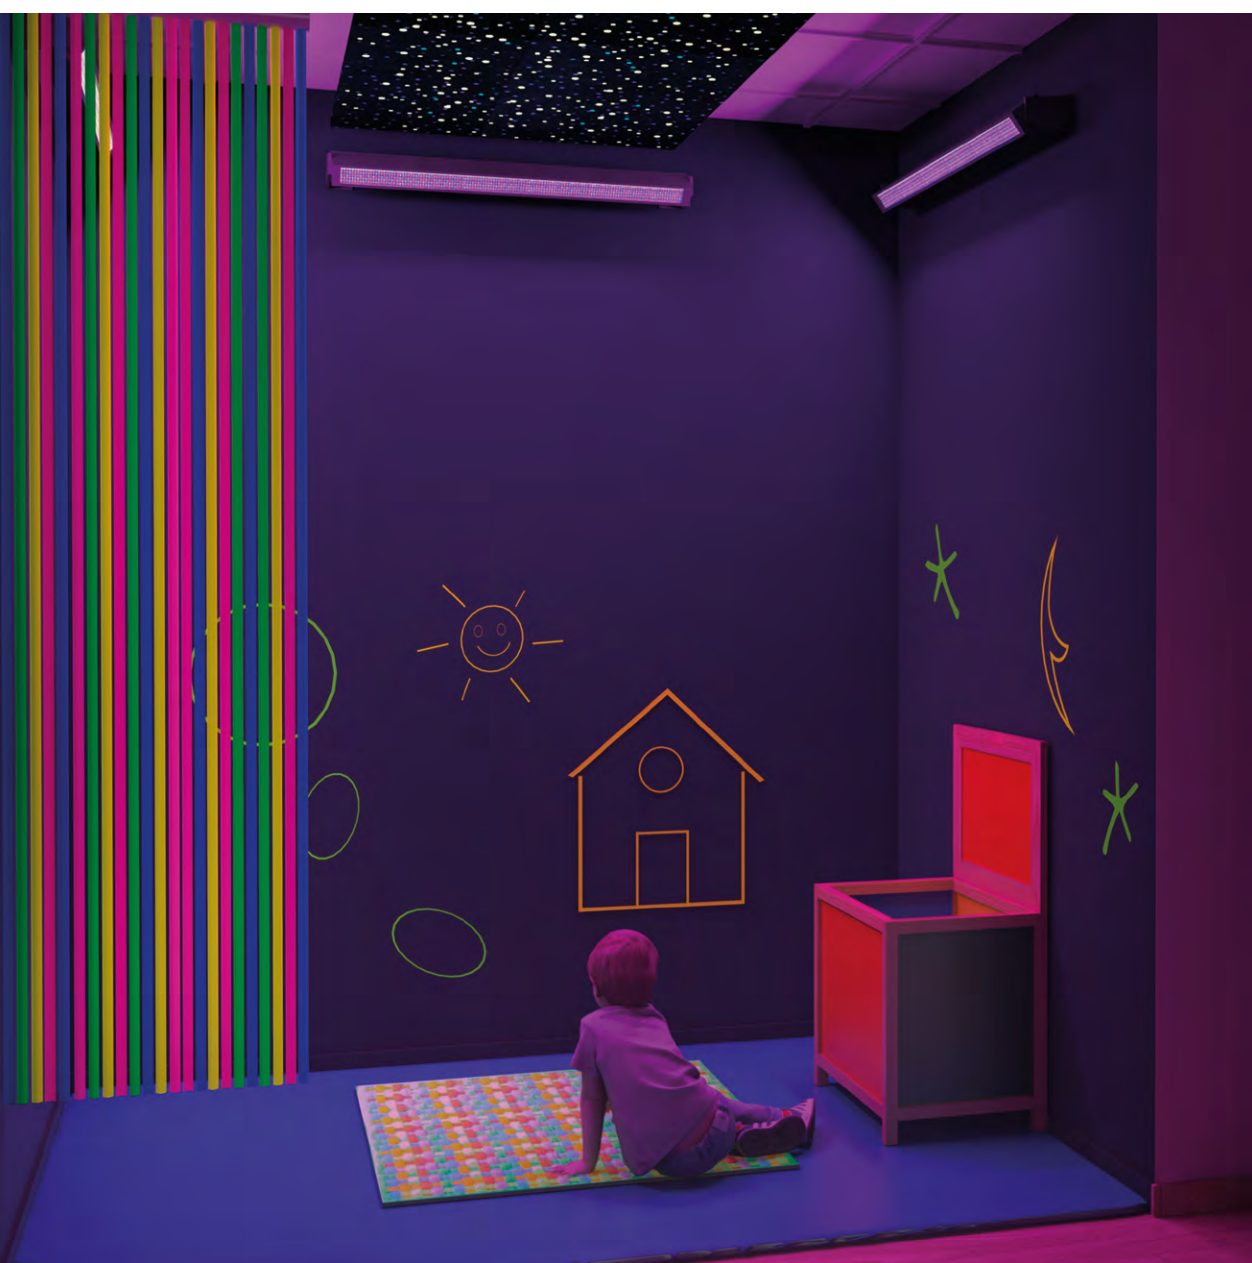

+ The room is immersive, interactive, and for all types of users. Press a button and immerse yourself in the world you want!

Open the door to a multisensory world with an ultraviolet corner or area in your sensory space. When the lights dim, the darkness reveals a universe of mysteries and objects that radiate and come to life in this unique space.

An ultraviolet corner

Hundreds of activities waiting to be discovered!

Benefits:

- aids concentration and focus
- teaching object permanence
- visual tracking of an eye-catching object
- identifying simple shapes.

+ Check our site for more sensory rooms examples. We adapt to your space, therapeutic objectives, and specific needs.

The space can be easily tailored to accommodate each child, aiding in the development of their sensory, cognitive, motor, and social skills. Young children learn through observation, exploration, and engaging with the world around them, using their senses to perceive and understand their environment.

A sensory space for childhood development

- Benefits:**
- stimulating visual and auditory recognition
 - taking turns
 - recognizing objects and characteristics
 - encourages communication and interaction

The different controllers empower the child to take charge of the room, fostering interaction, entertainment, cause-and-effect understanding, and skill development. Sensory spaces create inclusive environments, adjusting to the child's needs and providing different opportunities for self development.

Qinera's wide range of multisensory products and activities offer flexibility for diverse purposes including therapy, relaxation, communication enhancement, intervention preparation,playtime and more. Our technology offers solutions for different settings and needs.

A space in your center

A space tailored to every user and their needs

With a diverse selection of activities and settings, our products can be tailored to meet the unique requirements of each individual, making them suitable for users of all ages and abilities. From supporting early intervention in young children to addressing the needs of the elderly, Qinera ensures that every session is designed to achieve therapeutic objectives effectively.

- Benefits:**
- personal autonomy
 - memory stimulation
 - developmental support
 - emotional and behavioral control

What elements can I include in my room?

Create your own sensory space and gradually add different products and accessories, all of them compatible. Begin with simple tools such as a tube, a pouf or fiber optic strands and gradually add other elements that provide a greater number of opportunities for therapy and boosting well-being.

Control the user's level of interaction and stimulation as never before! Add your own videos and images, let your imagination fly and convert the room into a unique, customized space in which the user is the center of attention.

Qinera technology

Dive into the most immersive sensory experience!

Qinera's technology includes a central device for electronic control, a sound system, a vibration amplifier that provides vibroacoustic properties to different elements, a projector, and a tablet equipped with Qinera's software. This tablet allows room control and offers preloaded scenes and suggested therapy content. Manage interaction and stimulation levels, fostering creative and motivating participation.

Install Qinera technology and watch your space fill with inspiration and light!

BJ-EX04
SHX Compact
Including: Central device, computer, projection, speakers, vibroacoustic outputs and tablet with installed app.

BJ-EX02
SHX Rack
Including: Central device, computer, projection, audio system, vibroacoustic amplifier, tablet (Android or iOS) with case and installed app, cabinet.
BJ-EX02-2P
SHX Rack - dual display
Including: Central device, computer with dual projection system, audio system, vibroacoustic amplifier, tablet (Android or iOS) with case and installed app, cabinet.

What differs the Rack from Compact, is its size, the included cabinet for storage, and the two-channel vibroacoustic amplifier, which can control up to 4 VA elements.

Multisensory environments

Product measurements can be found on page 30

Encourage users to have more fun while they learn! Select your favorite switch for activating different sensory elements and configure them to suit the therapeutic goals. A user's ability to interact with their environment allows them to play a more significant role in the space and activity. This has a positive impact on the therapy program and its success.

Controllers

Qinera provides a diverse array of controllers designed to various cognitive and motor abilities. From switches to voice control and interactive devices like the sensory step and cube, our controllers facilitate engagement in a range of

activities. Experience the versatility of altering sensory environments using any physical object with Qinera's Proximity and Magic Table. Our controllers seamlessly integrate with lighting systems, sensory scenes, vibroacoustic elements, and special effects.

Activate all the effects and projections at the same time and control your sensory elements and devices with a single button.

 Product measurements can be found on page 30

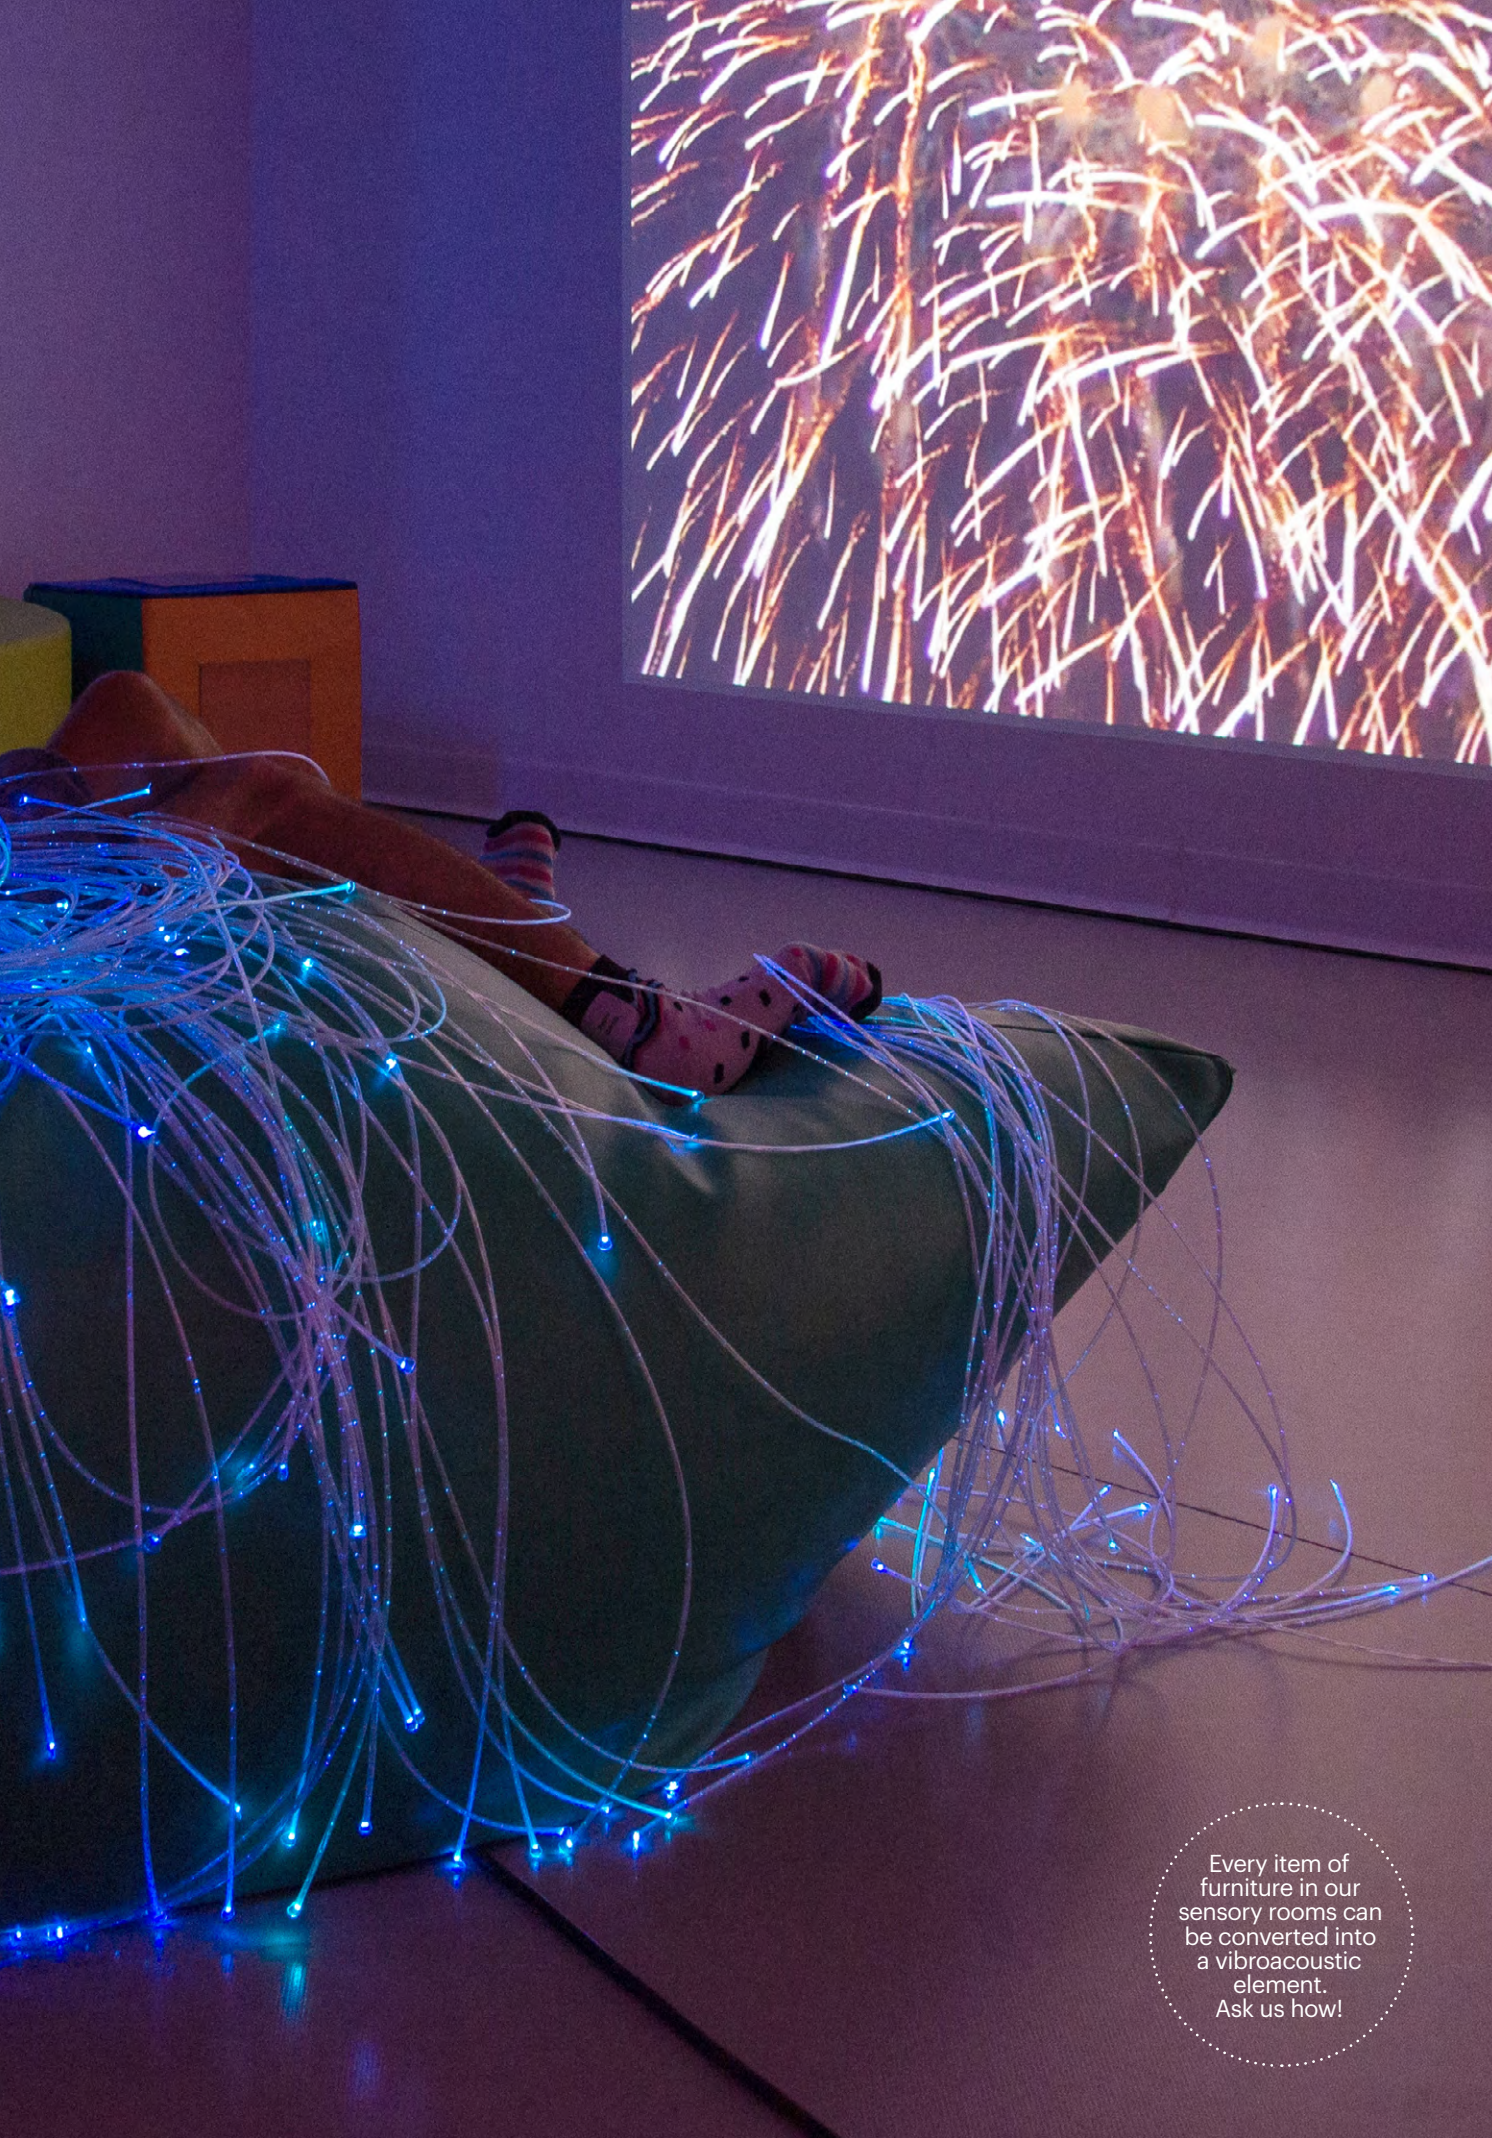

Choose the best control method for each person from our range of available controllers.

Comfortable furniture

 Product measurements
can be found on page 31

Every item of furniture in our sensory rooms can be converted into a vibroacoustic element. Ask us how!

Vibrations that run through the body in coordination with the music provide a tactile experience that, together with the music itself, has a great impact on the user and has been proven to have positive therapeutic effects. The rhythm of sounds, melodies or voices is accompanied by vibrations when you sit on a pouf to enjoy the sensory experiences around you.

Vibroacoustic elements

Feel the music run through your body during this vibroacoustic experience!

Working with vibroacoustic elements engage both auditory and proprioceptive senses. Vibroacoustics work on low frequencies, which cause the body's tissues to relax and blood vessels to dilate, promoting deep relaxation.

BJ-LPIS-V
Lumineo vibroacoustic pool

BJ-EMC-V
Vibroacoustic bed with legs

How do I get my sensory space?

Step by step

Ordering your own sensory space is simple.
You just need to follow those steps.

* Client is responsible for installation.
** Our support team will be available for online assistance on installation day as long as it is scheduled in advance.

Our mission is to accompany and support diversity as much as possible so that everyone has the same opportunities and can have an autonomous and happy life, being able to communicate, develop, grow and achieve their dreams. As a company formed by people, we want to be part of the change towards a truly inclusive society in which there is no need to talk about inclusion. We believe in empathy, equality, diversity, service, support, autonomy and an optimistic outlook.

We believe in people.
