KEY:	
✓	You can mount the selected FlexPoint® product without the need to buy additional assembly elements.
✓	You can mount the selected FlexPoint® product without the need to buy additional assembly elements. <b>However, it is not recommended due to the size mismatch.</b>
1	You can mount the selected FlexPoint® product conditionally (check the list below).
1	You can mount the selected FlexPoint® product conditionally (check the list below). <b>However, it is not recommended due to the size mismatch.</b>
✗	The selected FlexPoint® product cannot be mounted.

- To mount the FlexPoint® products, you must additionally buy the mounting elements FP-EM-7/P (if you already have the vest with the front adjustment P – user side) or FP-EM-7/T (if you already have the vest with the rear adjustment T – caregiver side). There are **two pieces** of the elements in a set – you need to buy **one set**. Mount the lower straps of the vest in the designated place on the frame of the stroller.
- To mount the FlexPoint® product, you must additionally buy the mounting elements. As the product can be mounted in several ways, you should buy the selected set of the mounting elements (1) FP-EM-1 or (2) FP-EM-1 + FP-EM-3. You need to buy **two pieces** of the selected set of the mounting elements.  
**For the FP-05 product equipped with the mounting triangle:** To mount the product, you must additionally buy the mounting elements. As the product can be mounted in several ways, you should buy the selected set of the mounting elements (1) FP-EM-1 or (2) FP-EM-1 + FP-EM-3. You need to buy **two pieces** of the selected set of the mounting elements.
- For the FP-05 product equipped with the buckles, fastened circumferentially:** If you have the FP-05 belt fastened circumferentially, you do not need any additional mounting elements.
- To mount the belts, use the additional mounting elements (1) FP-EM-1 or (2) FP-EM-1 + FP-EM-3. You need to buy **two pieces** of the selected set of the mounting elements.  
The belts consist of the **BASIC STRAPS** and **ADDITIONAL STRAPS**.  
**MOUNTING OF THE BASIC STRAPS:** The straps can be mounted in several ways. It is possible to mount the **BASIC STRAPS** without the use of the additional mounting elements. In that case, use the designated place at the frame of the stroller.
- MOUNTING OF THE ADDITIONAL STRAPS:** To mount the **ADDITIONAL STRAPS** you must additionally buy the mounting elements. As the **ADDITIONAL BELTS** can be mounted in several ways, you should buy the selected set of the mounting elements (1) FP-EM-1 or (2) FP-EM-1 + FP-EM-3. You need to buy **two pieces** of the selected set of the mounting elements.  
The belts consist of the **BASIC STRAPS** and **ADDITIONAL STRAPS**.  
**MOUNTING OF THE BASIC STRAPS:** To mount the **BASIC STRAPS**, use the additional mounting elements (1) FP-EM-1 or (2) FP-EM-1 + FP-EM-3. You need to buy **two pieces** of the selected set of the mounting elements.
- MOUNTING OF THE ADDITIONAL STRAPS:** To mount the **ADDITIONAL STRAPS** you must additionally buy the mounting elements. As the **ADDITIONAL BELTS** can be mounted in several ways, you should buy the selected set of the mounting elements (1) FP-EM-1 or (2) FP-EM-1 + FP-EM-3. You need to buy **two pieces** of the selected set of the mounting elements.
- To mount the FlexPoint® product, you must additionally buy the mounting elements. As the product can be mounted in several ways, you should buy the selected set of the mounting elements (1) FP-EM-1 or (2) FP-EM-1 + FP-EM-3. You need to buy **two pieces** of the selected set of the mounting elements – it applies to the front of the thigh abduction belts. The back of the thigh abduction belts is mounted in the designated place at the frame of the stroller.

8	It is possible to mount only the <b>FP-05</b> chest belt equipped with buckles, fastened circumferentially. The chest belt equipped with the mounting triangles cannot be mounted.
9	In case of the <b>JORDI™</b> chair, it is possible to mount the <b>FP-21</b> belts in the narrow ( <b>FP-21/W</b> ) as well as the wide ( <b>FP-21/S</b> ) version, provided that the seat is not equipped with a footrest. In case of the <b>JORDI™</b> chair equipped with a footrest or in case of the <b>JORDI HOME™</b> stroller (which is equipped with a footrest as standard), it is suggested to buy a narrow version of the belt.
10	To mount the vest, you must buy the "female" buckle member (mounting element <b>FP-EM-8</b> ) and mount it on the vest as instructed. <b>ATTENTION!</b> It is possible to mount only the vest with the rear adjustment <b>T</b> – caregiver side. After mounting the vest, the adjustment is no longer available. It is impossible to mount the vest with the front adjustment <b>P</b> – user side.
11	Mount the belts with the use of the wood screw ( <b>FP-EM-6</b> ) in the designated place. You need to buy <b>two pieces</b> of the element <b>FP-EM-6</b> .
12	Mount the belts in the designated place with the use of the mounting element: - For <b>KIDOO™</b> size 1, 2, 3 – <b>FP-EM-4-M6x16</b> - For <b>KIDOO™</b> size 4, 5 – <b>FP-EM-4-M6x20</b> You need to buy <b>two pieces</b> of the mounting element.
13	Mount the belts in the designated place with the use of the mounting element: - For <b>KIDOO™</b> size 1, 2, 3 – <b>FP-EM-4-M6x16</b> - For <b>KIDOO™</b> size 4, 5 – <b>FP-EM-4-M6x20</b> You need to buy <b>four pieces</b> of the mounting element.
14	Ankle stabilizers are available with the <b>KIDOO HOME™</b> and <b>JORDI HOME™</b> strollers, and also with the <b>KIDOO™</b> and <b>JORDI™</b> chairs equipped with footrests (for <b>KIDOO™</b> it is <b>KDO_616</b> or <b>KDO_618</b> ; for <b>JORDI™</b> it is <b>JRI_619</b> ). The size of the ankle stabilizers ( <b>FP-22</b> ) should be selected based on the measurement of the leg above the ankle, according to the size table on the website <a href="http://flex-point.pl/en/">flex-point.pl/en/</a> .
15	It is recommended to use the extender for universal stabilizing belt ( <b>FP-A-1</b> ).
16	The size of the ankle stabilizers ( <b>FP-22</b> ) should be selected based on the measurement of the leg above the ankle, according to the size table on the website <a href="http://flex-point.pl/en/">flex-point.pl/en/</a> .

**ATTENTION!** The sizes indicated in the table are only a suggestion.

Before buying the **FlexPoint®** belts, check the size table on the website [flex-point.pl/en/](http://flex-point.pl/en/) and select the appropriate size of the **FlexPoint®** product for the user.

**ATTENTION!** The detailed instructions for mounting the **FlexPoint®** products can be found in the user's manual of a given stroller or chair.

The user manuals are available on the website [en.akces-med.com](http://en.akces-med.com) in the given product tab.

# PRICE LIST 2023

Version: 19.06.2023

BodyMap® System refers to first class medical products which are designed for adults as well as children with cerebral palsy. All these products provide perfect stabilization during seating or lying position. What is more, it is a perfect choice for the disabled due to the fact that it prevents bed sores and muscle stiffness.

	<p><b>Vacuum pump</b> Handy, small vacuum pump, ideal for small and medium-sized cushions.</p>
	<p><b>Large hand pump</b> Highly efficient manual pump. Ideal for mattresses and big cushions.</p>
	<p><b>Self-adhesive function</b> The bottom of selected cushions is covered with self-adhesive function. Various elements can be easily attached to it with Velcro tapes which helps while stabilizing patients in the cushion or mounting the cushion in the desired place, e.g. in the stroller or a car seat. In other cushions, the self-adhesive function is made on request.</p>
	<p><b>Repair kit</b> For each cushion is added repair kit, which features a tube of neoprene glue, a set of patches and instruction manual.</p>
	<p><b>Valve with chain.</b> The pump valve is small and easy to lose. With the chain you'll never have to search for it.</p>
	<p><b>Service valve.</b> The service valve together with the granule bag (WG/1 or WG/2) makes it possible to control the amount of the granules in the BodyMap® cushions. Service valve is situated at the back of BodyMap® cushion thanks to which it is not very visible and, moreover, it is not an obstacle while using the product. The service valve is a standard equipment in the selected BodyMap cushions. In other cushions, the service valve is made on request.</p>

**Attention! The measurements have been made after the air was pumped out and the cushion was initially shaped. The tolerance of the dimensions in the size table is +/- 2 cm. The dimensions of the product may slightly differ depending on the way it is shaped.**

**BODYMAP® A**

BodyMap® A is a seat cushion which helps to stabilize and relieve patients as well as makes it possible to support hips in a wheelchair, positioning chair or ordinary chair. What is more, it is also possible to model an abduction wedge, raise one hip in order to maintain the correct position of spine or off-load sensitive body parts. The shape of the seat cushion can be easily changed if necessary.

<p>BodyMap® A+ – a sitting cushion with high lateral supports and a thigh abduction wedge. Our cushion helps keep a proper sitting position. A special abduction wedge reduces contractures of adductors and maintains the legs in the required position. An anatomic shape and lateral supports of the BodyMap® A+ cushion prevent the anterior pelvic tilt which provides comfort for bony prominences such as coccyx and sitting bones. This solution reduces the risk of bedsores.</p>

4	438	-	-	204	244	60	53	89	97	-

BodyMap® B is a back cushion which helps to stabilize and relieve patients. It provides comfort and correction of scoliosi and back curvature, at the same time improving the poor posture. The cushion increases the comfort of the sitting patient by ensuring the correct posture and the body stabilization. It also allows to obtain a correct and stable posture by patients with a hump. The shape of our cushion can be easily changed if necessary.

5	667	-	-	338	406	133	126	200	182	-	-

BodyMap® B+ backrest cushion with lateral supports is highly recommended for people with back and trunk muscle weakness and for everybody who's in a sitting position for a long time, e.g. in a wheelchair.

The cushion positions the patient and reduces the pressure on the bone eminence, i.e. shoulder blades or vertebrae. Our positioning cushion also reduces excessive stress on skin tissue which limits the risk of bedsores.

**CUSHION STABILIZING THE UPPER BODYMAP® M**

Price depends on cushion size

BodyMap® M cushion is an excellent product in addition to a daily rehabilitation. If your patient uses our standing frame, wheelchair or positioning chair with a table, you can mount our cushion on it and continue the therapy! You can shape the cushion according to the patient's needs, so you can place and maintain the hands and forearms in the required position. Our cushion precisely corrects upper limb deformations.

BodyMap® O roller provides body stabilization and correction in the lying position. The roller keeps the patient in the required therapeutic position and corrects deformations in thy lying position. It can also be used to relieve the particular body parts. Our roller is an excellent support in the positioning therapy of lying patients with pulmonological and trophic skin disorders.

The bath ring BodyMap® S Swimmer is an excellent solution for the youngest. The bath ring supports the head, keeping it above the water line and preventing it from immersion. It helps the child do all the water rehabilitation exercise and care treatments without the risk of choking or drowning.

Special trunk straps, supplied as a standard equipment, are fastened to the cushion and keep the patient in the safe position. The patient can move the limbs and trunk freely while using the cushion which allows them to do water exercise under load.

<b>VACUUM PUMPS</b>		
<b>CODE</b>	<b>NAME</b>	<b>PRICE (€)</b>
<b>BM_001</b>	<b>MANUAL VACUUM PUMP - SMALL</b>	
		Handy, small vacuum pump. Perfect for small and medium cushions. Each cushion includes this vacuum pump free of charge.
<b>BM_002</b>	<b>MANUAL VACUUM PUMP - BIG</b>	
		Very efficient manual vacuum pump. Perfect for mattresses and big cushions. Each mattress includes this vacuum pump free of charge.
<b>BM_003</b>	<b>ELECTRIC VACUUM PUMP</b>	
		Pump is ergonomically shaped and it is equipped with elastic connection pipe for BodyMap® cushions. Pipe is easy to carry and pump and, more to the point, it is comfortable to use. Pump is powered with the aid of batteries AA (1,5V x 6) (not included).
<b>BM_005</b>	<b>ELECTRIC DUAL-FUNCTION PUMP</b>	
		With electric dual-function pump it is possible to adjust the hardness of the cushion to the individual needs of the patient. This pump allows precise pumping out or in the air in order to achieve the desired hardness. Noiseless, efficient and made of durable aluminum. Strongly recommended for large cushions and mattresses
<b>BM_006</b>	<b>AIR VACUUM BLOW GUN</b>	
		The Air Vacuum Blow Gun helps to quickly increase the amount of granules in the cushion. It's especially recommended for large cushions and mattresses. Note: The use of the gun is only possible for cushions that have a service valve (ZW), which is not standard equipment on some cushions, and is made to order.

## ADDITIONAL EQUIPMENT

CODE	NAME	PRICE (€)	
<b>GRANULES</b>			
<b>WG</b>	<b>WG/1</b> 18x26 cm 50 g granules 2,5 liters	 <p>Bags are created so as to have control over the amount of granules in BodyMap® cushions. It is highly beneficial due to the fact that it is possible to adjust BodyMap® cushions to user's needs. It is necessary to take the size of BodyMap® cushion into account while choosing the size of bag with granules. There is a key added to the bag which facilitates opening and closing the service valve in order to add or decrease the amount of the granules. BodyMap® cushion has to be equipped with service valve in order to pour in or take out granules. The service valve (ZW) is custom-made.</p>	<b>31</b>
	<b>WG/2</b> 28x48 cm 200 g granules 9 liters		<b>59</b>
<b>REPAIR KIT</b>			
<b>ZN</b>		The repair kit includes a tube of neoprene glue, a set of patches and instruction manual. The set enables self-repair of minor damage of the BodyMap® cushion. The set is added free of charge to any BodyMap® cushion.	<b>7</b>
<b>SERVICE VALVE</b>			
<b>ZW</b>		The service valve together with the granule bag (WG/1 or WG/2) makes it possible to control the amount of the granules in the BodyMap® cushions. Service valve is situated at the back of BodyMap® cushion thanks to which it is not very visible and, moreover, it is not an obstacle while using the product. What is more, it is really easy to use it – you just need to unscrew cork and either pour in or take out specific amount of granules. <b>WARNING! You must order the granule bag (small – WG/1 or large – WG/2) separately if you want to add the granules to the BodyMap® cushions.</b>	<b>36</b>
<b>VALVE</b>			
<b>Z</b>		An indispensable element of every BodyMap® cushion. Allows you to deflate or inflate the cushion. It is a standard equipment for every cushion.	<b>33</b>

CODE	NAME	PRICE (€)
PP	<b>SUPPORT FOR THE FOREARM</b>	
		<p>It is universal and durable support with wide range of adjustments. Designed for stabilizing the upper limbs with BodyMap® System. Perfect for hemiplegia and hemiparesis to support and relieve upper limbs with paresis or palsy. Thanks to universal grip the support can be mounted on wheelchairs, special needs strollers, etc. This support is designed for use with BodyMap® E cushion. We can fix the cushion on the support using velcro tapes available in our offer also. <b>WARNING!</b> The price of the support does not include the BodyMap® E cushion, which must be ordered separately.</p>

### LAP TRAY

A lap tray is a multifunctional and portable tray. A special bag filled with granules makes it possible to stably place it on your knees or on other uneven surfaces. Perfect for home or school, during therapy activities, everyday activities and recreation activities. An ergonomic top made of a non-slip material has a special edge which prevents objects from slipping from the tray. There is a bag filled with granules attached to the bottom with Velcro. It has a special pocket which allows you to adjust the amount of the granules. There are two wide straps equipped with Velcro attached to the tray, which ensure a perfect stabilization. We can easily fix the tray to the beans with them. The tray is available in five sizes.

**NOTE! An additional bag with granules is available in two sizes.**

**Version: 28.02.2023**

**Prices are viled from: 28.02.2023**

FlexPoint® system consists of many elements which provide the correct and safe stabilization of the trunk, pelvis and lower limbs. Due to the universal attachment methods, it is ideal for the vast majority of strollers and car seats offered on the market of medical devices. The selected products of the FlexPoint® are equipped with additional elements allowing easier fastening of belts to people with hand disfunctions.

Depending on individual needs, the user can choose a classic solution or an advanced dynamic product. FlexPoint® is a system recommended especially for people with spasticity. The dynamic design of the products is based on soft, elastic and stretchable relieving elements. This guarantees the highest comfort of use. At the same time, it significantly reduces the risk of bodily injury which might be caused by, among others, the excessive pressure from inflexible belts.

The correct sitting position supported by the FlexPoint® means safety and comfort during work, therapy and recreation throughout the day.

# PRICE LIST 2023

Version: 28.02.2023

Prices are valid from: 28.02.2023

PCO® (Postural Compression Orthoses) are the medical devices class I, which provide dynamic compression and muscles control with pediatric neurologic disorders such as CP and spina bifida. They are more and more popular among physiotherapists and neurologists.

Dynamic PCO® orthoses are made of Lycra and neoprene elements which reduce pressure in bone prominences. Lycra provides deep pressure control abnormal muscle tone.

Our PCO® orthoses are available in various options: single arm or leg sleeves, suits and shirts.

High sensory dynamics and core stability treat the abnormal tone in case of neurologic dysfunctions. Deep compression of particular body parts send more and better sensory information to the brain, increasing proprioception, which in turn decreases high muscles tone and spasticity.

PCO® orthoses do not limit the range of motion and deep compression of joints normalizes the muscle tonus and reduces involuntary movements, which are often in CP children.

Using of Postural Compression Orthoses is recommended for many neuromuscular conditions, mainly CP, with following symptoms: high tone and spasticity, low tone, athetoid, dystonic, dyskinetic, ataxic and mixed presentation.

Dynamic PCO® orthoses are the best addition to traditional physical therapy and other occupational activities.

PCO products are made to individual order, production time is about 10 working days.

## POSTURAL COMPRESSION ORTHOSES

### MODEL: PCO-T-01

<b>LYCRA TLSO ORTHOSIS WITH NEOPRENE BACK PANEL</b>	Our <b>TLSO orthosis PCO-T-01</b> increases stabilization and body awareness in case of neurological disorders.		PRICE (€)
			<b>300</b>

### MODEL: PCO-T-02

<b>LYCRA TLSO ORTHOSIS WITH X-BACK PANEL AND CROTCH STRAP</b>	Our <b>pediatric TLSO PCO-T-02</b> increases stabilization and body awareness in case of neurological disorders.		PRICE (€)
			<b>333</b>

### ADDITIONAL X-PANEL

**21**

### MODEL: PCO-T-03

<b>LYCRA TLSO ORTHOSIS WITH BACK RIGID PANEL AND CROTCH STRAP</b>	Our <b>pediatric TLSO PCO-T-03</b> increases stabilization and body awareness in case of neurological disorders.		PRICE (€)
			<b>532</b>

### MODEL: PCO-T-04

<b>LYCRA TLSO ORTHOSIS WITH BACK RIGID CORSET AND CROTCH STRAP</b>	Our <b>pediatric TLSO PCO-T-04</b> increases stabilization and body awareness in case of neurological disorders.		PRICE (€)
			<b>633</b>

### MODEL: PCO-T-09

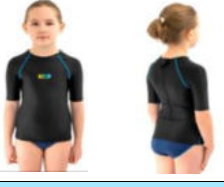

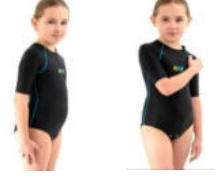

<b>LONG LYCRA DYNAMIC SUIT TLSO</b>	<b>Long Compression Dynamic suite PCO-T-09</b> is designed for stability and posture control improvement in case of neurological disorders. Provides trunk, pelvic and hip stability, improves balance and coordination and body awareness.		PRICE (€)
			<b>167</b>

### MODEL: PCO-T-10

<b>LONG LYCRA DYNAMIC SUIT WITH SHORT SLEEVES</b>	<b>Long dynamic suite with short sleeves PCO-T-10</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk and upper extremity and covers the sensory deficits.		PRICE (€)
			<b>200</b>

### MODEL: PCO-T-11

<b>LONG LYCRA DYNAMIC SUIT WITH LONG SLEEVES</b>	<b>Long Lycra dynamic suite with long sleeves PCO-T-11</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk and upper extremity and covers the sensory deficits.		PRICE (€)
			<b>233</b>

MODEL: PCO-T-16			
SLEEVELESS LYCRA DYNAMIC SUITE	<b>Sleeveless Compression Dynamic suite PCO-T-16</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk's and back's muscles and soft tissues.		PRICE (€)
			133
MODEL: PCO-T-17			
SHORT LYCRA DYNAMIC SUIT WITH SHORT SLEEVES	<b>Compression Dynamic suite PCO-T-17</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk and upper extremity and covers the sensory deficits.		PRICE (€)
			154
MODEL: PCO-T-18			
SHORT LYCRA DYNAMIC SUIT WITH LONG SLEEVES	<b>Short Compression Dynamic suite PCO-T-18</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk and upper extremity and covers the sensory deficits.		PRICE (€)
			173
MODEL: PCO-T-23			
UPPER BODY COMPRESSION ORTHOSIS	<b>Upper body compression suite PCO-T-23</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk's, back's and pelvic muscles and soft tissues.		PRICE (€)
			154
MODEL: PCO-T-24			
UPPER BODY COMPRESSION ORTHOSIS WITH SHORT SLEEVES	<b>Upper Body Compression Orthosis with short sleeves PCO-T-24</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk's, back's and pelvic muscles and covers the sensory deficits.		PRICE (€)
			173
MODEL: PCO-T-25			
UPPER BODY COMPRESSION ORTHOSIS WITH LONG SLEEVES	<b>Upper body compression orthosis with long sleeves PCO-T-25</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk's, back's and pelvic muscles and covers the sensory deficits.		PRICE (€)
			194
MODEL: PCO-L-01			
LONG COMPRESSION LOWER BODY ORTHOSIS	<b>Long compression lower body orthosis PCO-L-01</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk and lower extremities, including ankles, and covers the sensory deficits.		PRICE (€)
			213

MODEL: PCO-L-02			
COMPRESSION HIP AND LOWER LIMBS ORTHOSIS	<b>Compression hip and lower limbs orthosis PCO-L-02</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk and lower extremities and covers the sensory deficits.		PRICE (€)
			200
MODEL: PCO-L-03			
SHORT COMPRESSION LOWER BODY ORTHOSIS	<b>Short compression lower body orthosis PCO-L-03</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk, lower extremities and pelvis and covers the sensory deficits.		PRICE (€)
			173
MODEL: PCO-L-08			
LONG COMPRESSION LOWER LIMB SLEEVE	<b>Long compression lower limb sleeve PCO-L-08</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk and lower extremities, including ankles, and covers the sensory deficits.		PRICE (€)
			113
MODEL: PCO-L-09			
MIDI COMPRESSION LOWER LIMB SLEEVE	<b>Midi compression lower limb sleeve PCO-L-09</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of trunk and lower extremities and covers the sensory deficits.		PRICE (€)
			100
MODEL: PCO-L-10			
THIGH COMPRESSION SLEEVE	<b>Our thigh compression sleeve PCO-L-10</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of lower extremity and covers the sensory deficits.		PRICE (€)
			80
MODEL: PCO-L-11			
CALF COMPRESSION SLEEVE	<b>Our calf compression sleeve PCO-L-11</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of lower extremity and covers the sensory deficits.		PRICE (€)
			87
MODEL: PCO-L-12			
ANKLE COMPRESSION SLEEVE	<b>Our ankle compression orthosis PCO-L-12</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of ankle joint and covers the sensory deficits.		PRICE (€)
			74
MODEL: PCO-A-01			
UPPER LIMB COMPRESSION LONG SLEEVE	<b>Upper limb compression long sleeve PCO-A-01</b> is designed for stability and posture control improvement in case of neurological disorders. Improves function of arm and hand and covers the sensory deficits.		PRICE (€)
			107

MODEL: PCO-A-02			
FOREARM COMPRESSION SLEEVE	Forearm compression sleeve PCO-A-02 is designed for stability and posture control improvement in case of neurological disorders. Improves function of forearm and hand and covers the sensory deficits.		PRICE (€)
			87
MODEL: PCO-A-03			
WRIST AND THUMB COMPRESSION SLEEVE	Wrist compression sleeve PCO-A-03 is designed for stability and posture control improvement in case of neurological disorders. Improves function of hand and covers the sensory deficits.		PRICE (€)
			67
MODEL: PCO-A-07			
UPPER LIMB COMPRESSION SLEEVE	Upper limb compression sleeve PCO-A-07 is designed for stability and posture control improvement in case of neurological disorders. Improves function of arm and forearm and covers the sensory deficits.		PRICE (€)
			87
MODEL: PCO-A-08			
FOREARM COMPRESSION SLEEVE	Forearm compression sleeve PCO-A-08 is designed for stability and posture control improvement in case of neurological disorders. Improves function of arm and covers the sensory deficits.		PRICE (€)
			67
MODEL: PCO-H-01			
COMPRESSION CAP	Compression cap PCO-H-01 is designed for stability and posture control improvement in case of neurological disorders. Improves function of the head and covers the sensory deficits.		PRICE (€)
			67

Postural aids system in the lying position  
STABILO-BED

PRICE LIST  
2023

VERSION: 28.07.2023  
PRICES ARE VILED FROM: 28.07.2023

STABILObed® is the modular 1st medical class system that is used for precise and effective positioning the patient in the lying position. STABILObed® system has a wide range of applications. The STABILObed® system consists of independent elements: Different Shaped Cushions.

STABILObed® system is a range of blocks and cushions, used for stabilization of different body parts. They are covered by innovative fabric PureMed™.

This material is very safe for human and easy to sterilize. Particular components of system can be used for patient immobilization in diagnostic imaging (MRI, CT scan, X-ray).

Depending on type, shape and purpose, STABILObed® cushions are filled with:

	<b>Granulate</b> – micro-beads with small granulometry. The micro-beads may go smoothly inside the cushion and because of that, it can be anatomic-shaped very easy. What is more, PureMed™, with high vapour permeability, allows the air to go outside the cushion and be around the patient's body.
	<b>VISmemo™</b> - is our innovative memory foam. The foam creates initial shaping under the first pressure. Thereafter, the foam is more soft, because of patient's temperature. VISmemo™ foam is the most active in areas with high bed sores risk.
	<b>Comfort foam</b> – soft foam with a lot of closed, small air bubbles. It allows to maintain the patient's shape precisely.
	<b>Off-loading foam</b> – it's rigid technical foam, created in recycling process. The structure is closed what allows to back to initial position even after long-term lying.
	<b>Silicone</b> – this filling consists of silicone fibers in round shape with 0,5 cm diameter. There are air inside what prevents against the sweating of the user. The cushion filled silicone is very soft and lightweight and can maintain the perfect anatomic shape. It's Pressure-resistant even after long-term lying (supine) pressure.

	<b>PureMed™</b> is very safe for human and easy to sterilize. It consists of antibacterial components based on silver zeolite (AgZ) and because of it, there is a possibility of multiple use by patients in hospitals or rehabilitation centers.
	Each component of STABILObed® is covered by soft, skin-friendly material.
	The components of system can be used for immobilization of patient in diagnostic imaging (MRI, CT scan, X-ray).
	Some of the STABILObed® elements are covered by special non slip fabric. It increased the comfort of use and prevents against unwanted moving elements on the mattress.
	STABILObed® components are equipped with set of Velcro. It allows to place the cushion and wedges on the mattress covered by self-adhesive sheet and prevents against their migration.
	Special system of adjustment, located in the cover, helps to shape the STABILObed® parts.
	STABILObed® pillows adapted to the Tubular Mattress system have a Velcro straps that stabilize the pillows preventing them from moving.

		CATALOG CODE	PRICE (€)	CATALOG CODE	PRICE (€)	CATALOG CODE	PRICE (€)		
	<ul style="list-style-type: none"> <li>• Anti-bedsores cushion for the lower limbs P-SS-52 is an excellent choice for people who require additional comfort in the lying position. Its well thought-out design and anatomical shape make the cushion perfectly adjust to the body shape in two ways. First of all, it supports the shins and relieves the area of the heels and ankles while lying on the back.</li> <li>• Also, it separates the lower limbs while lying on the side. The thermoactive, soft ViSismo™ memory foam used in the cushion provides additional comfort of use and anti-bedsores prophylaxis. The foam helps to reduce the risk of pressure injuries or pressure ulcers in particularly sensitive areas such as ankles or the inside of knee joints.</li> <li>• Anti-bedsores cushion for the lower limbs P-SS-52 is a recommended solution for people with circulatory problems in the lower limbs and for people staying in the lying position for a long time (e.g. bedridden people or people after lower limb surgery especially during the recovery period).</li> </ul>	P-SS-52/1	79	P-SS-52/1/PZ	48	-	-	P-SS-52/1/PF	36

M-SS	TUBULAR MATTRESS	WASHABLE COVER		GRANULATING INSERT		FROTTE COVER			
		CATALOG CODE	PRICE (€)	CATALOG CODE	PRICE (€)	CATALOG CODE	PRICE (€)		
  <p>• The modular mattress enriches the STABILObed® range of products. The modular design based on 8 elongated segments filled with granulate is an invaluable support for the prevention of bed sores and during long-term care. Thanks to this design, PureMed™ material and spacer fabric, the mattress cover perfectly adjusts to the shape of the user's body.</p> <p>• The features of the cover and special openings between the segments provide a proper ventilation of the body and at the same time liquids such as sweat, blood or urine are not able to get through the cover inside the mattress.</p> <p>• Durable and well-thought-out design allows other STABILObed® components to be mounted directly on the mattress. It is possible thanks to the system of Velcro straps and special openings between the segments.</p> <p>• The arrangement of the openings on the whole mattress corresponds to the different body segments that we want to support - head, shoulders, trunk, upper limbs, lower limbs, etc. These segments also allow for complete flexibility when using other elements of the system, as needed along or across the mattress (check the correct way to attach the cushions to the mattress in the manual).</p> <p>• Any other cushions that do not require permanent attachment to the mattress can also be used.</p> <p>• The STABILObed® modular mattress is sized to fit standard hospital beds. It is applied directly on top of the bed mattress.</p>	<p><b>M-SS/1</b></p> <p><b>975</b></p>	-	-	-	-	-	-
